## Load printer with A4 paper and Click OK button

## **PLEASE READ OVER ALL - BEFORE YOU BEGIN**

The process above prints a fuser cleaning page and can take time to print. On occasion you may have to print several of these to clear any marks. Depending on what is to be cleaned, another method is to print a blank document (text or test page).

The Nota software has this feature built into the software. With A4 paper loaded, click the right hand side of the print button to access the print cleaning page option.
